

MJLA | SOLUTIONS: INTRODUCTION

MJLA Solutions is a business and development consultancy firm that acts as a partner to governments, international organizations, civil society and private institutions in the growth and development of a fair, prosperous and progressive society. We specialize in advising senior leadership to find innovative and intelligent solutions to development imperatives and policy challenges that have a direct impact on people's lives.

MJLA Solutions provides extensive assistance and support in devising policies that produce practical results and real advantages. The successful implementation of even the best policy is no less a challenge than devising the policy itself. Development is the aggregate of positive changes which last. MJLA Solutions advocates a proactive approach towards development.

Sustainable development is a function of integrating political will, technical expertise, stakeholder participation, and resources, around a clear vision of reforms and change, for vigorous execution with focus on measurable results.

From a policy proposition that works to operational excellence that delivers, there are numerous intersecting factors – economic, financial, political, social, legal, technological and moral – that decide the continuing and lasting success of development efforts.

We work closely with our partners to identify issues, analyze situations, deliberate options, integrate relevant disciplines, devise strategies, marshal resources, engage stakeholders, and build momentum and focus in order to develop and execute a strategic roadmap to achieve objective-based results.

From agenda-setting for deliberations to defining goals for results – and from proposing a solution till results are at hand – we provide integrated, clear, practical and focused advice for creating and sustaining change that adds to fairness, prosperity and dynamism in a society.

In providing our services, we blend clarity, thoroughness, creativity, speed and accuracy to produce development solutions, with a view to honoring our strong commitment to the society we serve.
